Digital Literacy Awareness

Digital literacy is an important skill for students these days because we are living in a world that is all about technology. It is about being able to use tools and platforms in a way that is effective and responsible. This means you need to have some skills but you also need to be able to figure out if the information you find online is true, communicate with people in a way that is appropriate and use the internet safely.

This infographic highlights key aspects of digital literacy that are particularly important for students.It begins by explaining what digital literacy then it talks about some tools that can be really useful like calendars to help you manage your time platforms that let you work with other people apps that help you take notes and cloud storage that lets you get to your files from anywhere. These tools can really help students get more done and stay on top of their school work.

It also talks about how to be safe on the internet. Students need to know about the risks that're out there like people trying to steal their information and they need to take steps to protect themselves like making strong passwords, checking to make sure the information they find is true, being careful about their privacy settings and not clicking on links that look suspicious. If you are careful online you can protect your information and your digital identity.

The infographic also talks about why it's a good idea to have a professional online presence. Students should try to have profiles that're consistent and respectful, join in on online conversations, show off their skills and the things they have accomplished and be careful about what they post online. If you have an online presence it can really help you with school and your career.

Overall this infographic is trying to help students understand why digital literacy is so important. It is trying to show them how to use technologies in a way that is effective, safe and responsible. Digital literacy is a part of being successful in today's world and students need to know about it. The infographic is trying to get this message across in a way that's clear, easy to understand and

visually appealing. Digital literacy is something that all students should know about. This infographic is a great resource for learning about it.
